

TREEFROG®

WATCH OUT  
FOR THE  
FROG!

100%  
TREE-FREE  
STICKY NOTE

This little frog is the biggest thing to hit the office since the invention of the sticky note. TreeFrog® paper looks like paper, and writes like paper—but it's **100% Tree-Free**.

That's because it is made out of 100% sugar cane fiber. These notepads are just like normal self-stick notes—sticky, writable, and recyclable. The only difference is they aren't using trees, rather a completely abundant, renewable resource.

Redi-Tag® TreeFrog® Notes are elemental chlorine-free, dye-free, and use a non-solvent water-based adhesive.

When you choose Redi-Tag® TreeFrog® Notes, you are actively participating in creating a cleaner, more beautiful environment.

**A.- D. REDI-TAG® TREEFROG® NOTES**  
**THE ORIGINAL 100% SUGAR CANE FIBER NOTEPADS**  
**NATURAL, CLASSIC WHITE & ASSORTED**

Patent Pending

| ID No.     | Description                    | Size           | Packed  | Price |
|------------|--------------------------------|----------------|---------|-------|
| 1 RTG27405 | Classic White Pads             | 1-1/2" x 2"    | 12 Pads | 10.75 |

100%  
TREE-FREE  
STICKY NOTE

#### WATCH OUT FOR THE FROG - SUSTAINABILITY

Tree frogs are very sensitive to changes in their natural environment. Their susceptibility is used as an early indicator to read the general health of ecosystems in certain parts of the world.

Redi-Tag® introduces TreeFrog® Notes, the first and only 100% sugar cane fiber sticky notes. They look and perform like fine quality sticky notes, however they are completely tree-free, without wood or wood-based fibers. TreeFrog paper uses bagasse or, sugar cane, an abundant and renewable resource.

Trees can take ten or more years to mature. Alternatively, sugar cane can be harvested twice a year. TreeFrog® paper is made from sugar cane by-products, and is never harvested for paper production alone. By only using the waste by-products, there is also a reduction considering the landfill and air pollution associated with the disposal of sugar cane. Furthermore, any waste or by-products from the paper production process are recycled for other companies by the factory.

Redi-Tag® combines TreeFrog® paper with a proprietary water based adhesive, opposed to a chemical based. The combination makes an exceptionally environmentally friendly note. **Any other sticky note just isn't the same.**

Redi-Tag® TreeFrog® Notes are patent pending. TreeFrog® paper is ISO 9001, ISO 14001, & ISO 17025 compliant.
